SUMMARY

Team Lead of an **MSME-funded (9 Lakhs) live healthcare platform** serving real doctors and patients. Built and deployed production-grade AI systems — multi-tenant RAG SaaS with sub-400ms hybrid retrieval and clinical decision support using LLMs. Specialising in Python backend engineering, LLM pipelines, and scalable AI application development.

PROJECTS

DocuMind Enterprise — AI Document Intelligence Platform

Live  GitHub

FastAPI, Pinecone, PostgreSQL, Redis, Celery, Cohere Rerank, Gemini Flash, Next.js 15

- Built a **production-grade multi-tenant SaaS RAG platform** with 3-stage retrieval (Hybrid Search/RRF + Cohere Reranking + SSE streaming), achieving **sub-400ms latency** with strict tenant isolation via scoped Pinecone namespaces and PostgreSQL row-level filtering.
- Implemented **LLM-as-a-Judge** quality evaluation (Groq/Llama 3.1) and Semantic Redis Cache delivering **50ms on repeated queries** with async Celery ingestion pipeline and automatic retry logic.

Doc2U — AI-Powered Doctor Appointment & Teleconsultation Platform

doc2you.in

FastAPI, Next.js, PostgreSQL, SQLAlchemy, JWT

MSME Funded — 9 Lakhs — Team Lead

- **Live platform with real doctors onboarded**; as Team Lead & Backend Developer engineered **25+ RESTful API endpoints** covering appointment booking, availability, and JWT-based multi-role authentication.
- Built an AI-driven **smart triage module** routing patients to home-visit or video consultation based on symptom severity scoring.

RAG-Based Rare Disease Diagnosis System

Live  GitHub

Python, LangChain, FAISS, Groq (Llama-3.3-70B), FastAPI, Streamlit

- Built a **RAG pipeline** over 1,500 rare disease records (Orphanet) using FAISS semantic search + Llama-3.3-70B, achieving **Top-1: 93% match accuracy** on unstructured symptom narratives as a proof-of-concept for AI-assisted rare disease diagnosis.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, C, HTML, CSS
- **Backend & API:** FastAPI, Flask, SQLAlchemy, Celery, Pydantic v2, RESTful API Design, JWT, OAuth2
- **AI / ML & LLM:** LangChain, LangGraph, FAISS, Pinecone, Cohere Rerank, Hybrid RAG (RRF), LLM-as-a-Judge, HuggingFace, Groq, Gemini API, Ollama, TensorFlow, Keras, OpenCV, YOLOv5, Scikit-learn
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Frontend:** Next.js, React, TypeScript, Tailwind CSS, shadcn/ui
- **Cloud & Tools:** AWS, GCP, Docker, Git, GitHub, Render, Postman

INTERNSHIP

Cloud Computing Intern

Cloud Bees Tech — 4 Weeks

Configured AWS, Azure, and GCP environments; developed Python automation scripts for cloud resource provisioning.

Web Development Intern

EISYSTEMS Services (Technex, IIT BHU) — 4 Weeks

Built a Python learning website using HTML; completed responsive web development training.

CERTIFICATIONS

5-Day AI Agents Intensive — **Kaggle × Google**
Prompt Engineering — **Simplilearn**
Intro to Cybersecurity — **Cisco**

Fundamentals of Agents — **HuggingFace**
Python 3.x Programming — **SkillRack**

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning
IFET College of Engineering, Villupuram, Tamil Nadu

May 2025
CGPA: 8.0
